

St Augustine's Presbytery

Client: St. Augustine's Church, Coatbridge

Contract value: £150,000

Completed: February 2012

Following on from the successful repair and reroofing of the main church building, general stonework and roofing repairs were carried out in the adjoining Presbytery. The Grade B Listed building, originally designed by Pugin, is one of similar churches in the region for which the practice has provided specialist repair advice.

The complex at St Augustine's, which also includes a hall, is undergoing progressive external fabric repairs and this project included lead replacement, reslating, stonework repointing and indenting, as well as chimneyhead repairs
