

LESS IS MORE, MORE OR LESS.....

It's summer, so they say, so less commuting traffic and more time off for most. But here we are as busy as ever!

SCHOOL'S OUT

Summer holidays are a good time to get school building work done.

Adding to our education sector clients, we are delighted to have recently provided service to Edinburgh Academy. Our recent experience covers private and public schools, from nursery to further education.

STAYING HEALTHY

With more refurbishment at the Glasgow Royal Infirmary, Inverclyde Royal Hospital and Royal Alexandra Hospital, our healthcare team continues to help our NHS, Hubco and Framework clients with improvement to acute and primary care facilities.

RETAIL THERAPY

We are about to go to site with 7 new build retail units for East Ayrshire Council in Cumnock.

ARCHIPELAGO ARCHITECTS

Further new-build housing commissions for Orkney Housing Association mean more plane trips for Wendy, our new partner.

A FUTURE IN THE PAST

Our conservation team continue to be busy, with new commissions for repair and refurbishment work in Kilmarnock, Kilmaurs and Newmilns, as well as ongoing restoration and improvement to the Grade A listed Dean Castle for East Ayrshire Council under their framework commission.

COMPLYING WITH COMPLIANCE

Being registered with Constructionline, CHAS, SSIP, ISO 9001, ARB etc, we have easily met the demanding pre-qualification requirements for public tendering, local authority frameworks (3 of which we have secured) and Hubco supply chains. Clients can be comforted that we can produce the necessary `paperwork` in support of our skills, financial stability and implementation of best practice.
